First Solar Series 6 Plus
ADVANCED THIN FILM SOLAR TECHNOLOGY

HIGH-POWER PV MODULES
First Solar Series 6 Plus photovoltaic (PV) modules set the industry benchmark for reliable energy production, optimized design and environmental performance. The advanced design is optimized for every stage of your application, significantly reducing balance of system, shipping, and operating costs.

PROVEN PERFORMANCE
• With superior temperature coefficient, spectral response and shading behavior, Series 6 Plus modules generate up to 8% more energy per watt than conventional crystalline silicon solar modules
• Unlike crystalline silicon modules, First Solar’s thin film technology does not experience the losses associated with LID and LeTID
• Anti-reflective coated glass enhances energy production

INNOVATIVE MODULE DESIGN
• Under-mount frame provides the cleaning and snow-shedding benefits of a frameless module while protecting edges against breakage
• Innovative SpeedSlots™ combine the robustness of bottom mounting with the speed of top clamping while utilizing fewer fasteners to achieve the industry’s fastest installation times and lowest mounting hardware costs
• Dual junction box design optimizes module-to-module connections and eliminates the need for wire management

430-460 Watts
Up to 18.3% Efficiency
